

L: 30mm W: 25mm H: 5mm

Benefits:

- Small Size, Low Power Consumption and PCI Express Interface for Mobile Applications
- Fast Integration and Time-to-Market
- Cost-Effective and Highly Scalable
- Compatible with Most Tags

2-Port, Embedded UHF RAIN® RFID Module

ThingMagic Nova is an ultra-small, power efficient, EPC Class 1 Gen 2 reader/writer module. A cutting edge ARM Cortex microcontroller and the latest RAIN UHF transceiver technology combined with the reader's intelligent operating system make this a feature-rich module.

The ThingMagic Nova adheres to the PCI Express Mini half card form factor, a widely popular format, allowing the Nova to be used quickly and easily. Its small size allows this module to fit into almost any new or existing Original Equipment Manufacturer (OEM) design.

ThingMagic Nova's low power features, including software stand-by mode and sleep mode, wide-input voltage range, and highly efficient switching power design makes it well-suited for battery-powered and other power sensitive applications.

ThingMagic Nova utilizes two antenna ports that can be selected via software control, making this module well-suited for mobile or fixed applications. ThingMagic Nova provides an interface board in the same form factor as the M9, providing the absolute shortest path for integration into existing applications.

It uses common blade technology, including common size and connection methods, for maximum design and solution flexibility. Its simple and intuitive API and ability to adjust to various software host interfaces, including UART (TTL), SPI, USB, and I2C, make it easy to integrate.

Applications:

- Mobile Computing Applications, such as Tablets and Handhelds
- Fixed OEM Applications

ThingMagic Nova

RF Transceiver	Impinj R2000		
RF Output Power	Supply Voltage	Antenna Options	Weight
10dBm - 27dBm	2.0-5.5V	2 antenna ports, 50 Ω impedance	3.0 g

About JADAK:

JADAK, a business unit of Novanta, is a market leader in machine vision, RFID, barcode, printing, and color and light measurement products and services for original equipment manufacturers. The business designs and manufactures custom embedded detection and analysis solutions that help customers solve unique inspection, tracking, scanning and documenting challenges. JADAK is based in Syracuse, New York, with sales and technical locations across the globe. For more information, visit www.jadaktech.com. ThingMagic is JADAK's RFID line of products.

Novanta is a trusted technology partner to OEMs in the medical and advanced industrial technology markets, with deep proprietary expertise in photonics, vision and precision motion technologies. For more information, visit www.novanta.com.
